

Talleas plastic cladding

HIGH-QUALITY, DURABLE AND RECYCLABLE

Talleas plastic cladding

High-quality, durable and recyclable

As a genuine alternative to conventional plastic panels, PASCHAL offers the option of selecting the formwork facing for all PASCHAL panelled formwork in a high-quality plastic version.

The advantages of the Talleas plastic cladding at a glance:

- **Recyclable:** Made from upcycled plastic
- **Durable:** particularly long service life
- **Very good surface:** For the best fair-faced concrete results
- **Low maintenance and cleaning effort**

100% recyclable

The core of the panel is made from 100% recycled materials and has an extremely long life cycle.

At the end of its life cycle, the board is taken back and returned 100% to the same cycle, where it is processed into new board cores.

Quality

The panel structure and the materials used guarantee a good surface quality of the concrete in the long term with low maintenance and cleaning requirements.
