LOGO.3 and NeoR

Great savings with large-size panels

PASCHAL large-size panels can be used wherever large areas need to be shuttered. These panels require very few connecting pieces, which results in excellent shuttering times. The targeted use of compensation and large-size panels can save on tie points. In addition, the continuous plywood provides an outstanding formwork appearance in exposed concrete.

Order now at the special package price:*

*Plus VAT. Each package must be taken as a whole. Each package consists of 4 identical panels.

Art.-No.	Description	Quantity	Unit price	Total price	Saving
N179.001.2400	LOGO.3. panel 240 x 340 cm	4	€ 3,452	€ 10,550	€ 3,258

The advantages of LOGO.3 and NeoR at a glance:

Fewer tie points

The targeted use of compensation and large-size panels can save up to 4 tie points in the corner area, for example.

Flexible wall formwork

The LOGO.3 wall formwork adapts to any floor plan with its balanced panel arrangement.

Cost-effective forming

Thanks to standard tension material (DW15 and DW20) and compatibility with LOGO. pro and LOGO alu.

LOGO.3

Universally applicable

Thanks to the balanced panel arrangement, many different concrete components can be formed.

Flexibility

All panels of the NeoR lightweight formwork can be combined with each other in a standing and/or lying position.

Economical forming

The small number of tie points means that NeoR lightweight formwork saves time and labour costs.

NeoR

- Save up to 3.258 € with the package prices for LOGO.3 and NeoR
- Excellent shuttering times
- For demanding exposed concrete surfaces with an outstanding formwork appearance
- Can be combined with the Secuset lateral protection system from PASCHAL
